Measure 1: Length of Time Persons Remain Homeless

This measures the number of clients activeb in the report date range across ES, SH (Metric 1.1) and then ES, SH and TH (Metric 1.2) along with their average and median length of time homeless. This includes time homeless during the report date range as well as prior to the report start date, going back no further than the look back stop date or client's date of birth, whichever is later.

Metric 1.1: Change in the average and median length of time persons are homeless in ES and SH projects.

Metric 1.2: Change in the average and median length of time persons are homeless in ES, SH, and TH projects.

a. This measure is of the client’s entry, exit, and bed night dates strictly as entered in the HMIS system.

	Universe (Persons)	Average LOT Homeless (bed nights)	Median LOT Homeless (bed nights)
1.1 Persons in ES-EE, ES-NbN, and SH	6,227	69.00	40.00
1.2 Persons in ES-EE, ES-NbN, SH, and TH	7,170	82.00	40.00

b. This measure is based on data element 3.917

This measure includes data from each client’s Living Situation (Data Standards element 3.917) response as well as time spent in permanent housing projects between Project Start and Housing Move-In. This information is added to the client’s entry date, effectively extending the client’s entry date backward in time. This “adjusted entry date” is then used in the calculations just as if it were the client’s actual entry date.
